MagnaCryl 2464

Product Information Sheet

UV Protective Coating

Conforms to Boeing's BMS 1060-A

Viscosity	Color	Wt/Gal	Diluant	Shelf Life
3,000 cps	Clear	8.6	Do Not Dilute	12 months

MagnaCryl 2464 is a UV curable, permanent coating providing painted and bare metal aircraft parts with a protective coating against exposure to jet fuels and other aircraft fluids. It meets Boeing's BMS 1060-A specification to protect aircraft parts from exposure to standard aircraft fluids.

MagnaCryl 2464 can be applied by spray or brush. To cure MagnaCryl 2464, a UV curable lamp is required. If your company does not have UV curable equipment, we recommend the following sources to buy or rent this equipment.
